

FOREWORD

Fellow Ghanaians,

On 25th February 2012 a determined, progressive group of like-minded men women all over country held a convention to outdoor a focused, vibrant, independent-minded progressive Political Movement. We named our Movement Progressive People's Party (PPP).

Ever since that day, sun has been shining brightly in Ghana. We have worked selflessly to organise a credible, united, disciplined political party. We have worked tirelessly towards visibility great strength everywhere in Ghana. We have prepared a clear, specific Platform Accelerated Change that we will use to deliver world class education, healthcare jobs to Ghanaian society in our lifetime. We will start this transformation in Ghana competent incorruptible leadership.

Our promise to Ghanaians is that if you vote PPP to win power, in four years, we will transform social economic fabric of nation to facilitate creation of millions of jobs our people are looking for. We stand on platform of Jobs, Jobs, Jobs, every Ghanaian. PPP wants to form a union teachers to provide high quality free, compulsory continuous education kindergarten to senior high school that will be foundation job creation in Ghana.

The end game is to get our people well prepared millions of high grade jobs that PPP will inject into Ghanaian economy. Ours is quality education a purpose. today, when you hear PPP, think Jobs, Prosperity Peace. When you tell your mother, brother, colleague or classmate to vote PPP they ask you why, simply tell them, it is time to change our level of prosperity third world to first world through competent incorruptible leadership.

Awake to Competent Leadership Awake to Incorruptible Leadership
(Leadership that is not corrupt). Awake to Education, Health Jobs
Every Ghanaian!

PKN Papa Kwesi Nduom Presidential Candidate.

Chapter 1

A United, Empowered People in an Inclusive Society:

True progress cannot be obtained without a unified Ghana. PPP is asking your votes so that we can create an inclusive, united Ghanaian society ≠ Team Ghana. It is this new national unity that will reinvent Ghana. We, promise to build one solid Team Ghana by reinventing our Ghanaian selves, our attitudes our way of life. Progressive People's Party has arrived amidst massive changes to Ghanaian Nation.

The vast majority of our population is under 35 years old. We have millions of young men women desperate to get better healthcare, education jobs. We know, certain, that Ghanaian people are sitting on top of trillions of dollars of Gold, Oil, Bauxite, Iron Ore, Manganese, Diamonds vast tracts of fertile land desperate simple irrigation. first time in fourth republic, it is clear that we have youthful demand bountiful resources to be used to dramatically improve education, healthcare jobs. But we cannot benefit these natural resources until Ghana has leadership that is truly democratic does not aim to be an elected dictatorship. Ours is a leadership that is prepared to give some of its power to people in order to unleash energy of self-determination. Progressive People's Party promises to give power back to people to ensure broad national development prosperity.

In these times of dramatic economic social change, one thing has remained constant ≠ a toxic, winner-takes-all political culture that has a deadly vice grip on throats of our people. If we do not take concrete, sure steps away this political culture, we will remain a nation made poor by leaders who just want to win power sake of winning power to further their aims of self-enrichment.

The PPP has emerged courage to stand up say we are not just here to give empty promises to win power. We will not abuse name of Lord vain

prophecies. We will not proclaim that we are not corrupt, yet refuse to disclose our taxes, assets, health status sources of party funding.

We are here to let every single Ghanaian know that if you vote PPP, you, as a Ghanaian citizen will win power, whether you are Christian, Muslim, male or female, young or old; or Living Disability. We are here to let you know that if PPP wins this election, every single individual that votes will be a guaranteed winner, no matter which political party you voted for.

You will win power because PPP believes that no political party can bring true progress to Ghana unless we share power people. Together, we can use power of our individual votes to destroy winner-takes-all, elected dictatorship established by 1992 constitution. We will reform our constitution to strengthen parliament, elect district, municipal metropolitan chief executives create a strong independent public prosecutor to root out government corruption. In addition, PPP gives a firm, unshakable promise to work Parliament to pass Right to Information Bill to bring transparency encourage accountability in government.

To move Ghana forward, we, people of Ghana, must vote to constrain absolute power of President. So far, PPP is only political party bold enough to pledge to reform constitution in its first term to ensure effective democracy by removing aspects of 1992 constitution that were designed to perpetuate a winner-takes-all ruling party which promotes corruption. PPP wants your votes to gain authority to make it happen. Ghana desperately needs to upgrade its political system to match strides that our economy society can make in 4th Republic. PPP is offering a bold transformational change that will do away current intensely exclusionary political system. This is change that PPP is offering you in 2016 elections.

Chapter 2

PPP's Affirmative Action Women & PWDs

Affirmative action is about building skills, providing training working diligently to guarantee seats positions to make it possible to break male domination in legislature, executive judiciary.

If you vote PPP we promise to rally all Ghanaians to work harder more diligently to implement affirmative action policies programmes to give our women persons disabilities, opportunities to develop their potentials in life.

Specifically,

- i. Our compulsory education policy all of our children kindergarten to senior high school will ensure that our girls receive a decent

education just as boys. Education as a great equalizer will provide equal opportunity in life to our women persons disabilities.

ii. PPP has actively encouraged women to become parliamentary candidates. Affirmative action in politics cannot be done only by reducing nomination fees.

iii. We will put into place Women's Enterprise Development Agency to train, encourage promote growth development of women entrepreneurs in country. This will include technical assistance, low interest loans setting aside of portions of government contracts to enterprises founded managed by women persons disabilities.

iv. PPP will ensure passage of Spousal Property Rights Bill within six months of assuming office if it is not passed before January 7, 2017.

Affirmative Action People Disabilities (PWDs):

We pledge to continue to encourage people living disability in our society to embrace progressive, humanistic common sense approach of PPP to solving problems. Ghana has very few people disability working as business women men, nurses, traders, teachers, doctors, lawyers, bankers, ministers, members of parliament heads of state institutions etc. because of a lack of political will to put PWDs in such positions. We will change that immediately we come into power in 2017.

Specifically,

i. We will work Ghana Federation of Disabled (GFD) to ensure that children disability are given all special facilities they need to study under our compulsory education policy.

ii. We will sanction healthcare professionals who intimidate PWD patients at their facilities while corrective surgeries would be performed children free of charge, when required as early as possible under NHIS.

iii. We will ensure that all MDAs will make public facilities services accessible to PWDs as well as make Legal Aid Services free accessible all PWDs.

iv. We will also ensure full enforcement of laws governing accessibility to PWDs in all public commercial buildings.

Chapter 3

Our Commitment to People of Ghana:

Over past 24 years, two political parties, have tried their best

applied their "property owning" "social democrat" ideologies to country's problems. Theirs have been change of slow, incremental kind which sometimes has led to a "one foot forward one foot backward" experience. Under these two parties, corruption has become unprecedented.

Our orientation our core beliefs about world we live in are Progressive. This means we believe in broad-based human progress that is felt by people. We believe that under our leadership, Ghana shall move a third world nation to a first world nation by working a great sense of duty urgency within one generation.

We believe in Ghanaian excellence. We believe in Ghanaian prosperity. We believe in all of Ghanaian people. Our pact you is that, once elected, we will fight dramatically accelerated developmental progress. We will fight to move Ghana away maintenance of mediocrity, culture of indiscipline, constant failure of leadership, cruelty of resource mismanagement tragedy of low expectations developing African nations such as Ghana.

Forgotten Ghana:

There is no better Ghana anywhere in country. While people sit in air-conditioned offices media houses to engage in endless arguments over statistics, people out there are suffering slow pace of development. past governments were given mandate to end poverty in all forms they have failed. PPP insists that past governments have failed because people are still drinking disease infected water they are driving on dangerous roads. They are saddled low quality of education, poor housing, preventable diseases very, very high unemployment. Out there in country, there is no hope a productive prosperous Ghana. In many of these areas their experience has not changed in last 24 years. Communities such as Gizaa, Zaare, Wulensi, Widana, Awaso, Pudia, Agortoe, Efutu Mampong, Amanfro Obom, many more comprise a "Forgotten Ghana" that we can no longer afford to neglect. Ghanaians are looking redemption PPP has made itself abundantly available, running to rescue of our people. We encourage all Ghanaians to in turn embrace safe haven offered by PPP. We have reviewed this unfortunate situation crafted our solutions to problems confronting our nation its people. PPP is offering sustainable development that will be felt by everyone through savings we make by fighting corruption.

Chapter 4

Our Political Platform:

We are pleased to present to you PPP Political Platform 2016 elections. Ours is a simple, yet powerful agenda. We have resisted temptation to produce a huge book of empty promises that cannot be implemented. Ghanaians have been disappointed enough times in this

Fourth Republic. Ghana already has Directive Principles of State Policies in our Constitution to guide our agenda, policies programmes.

To that end, PPP seeks opportunity to implement an efficient Agenda Accelerated Change that is built on Incorruptible Leadership, Education, Healthcare Jobs. We will implement Agenda in spirit of inclusiveness that will enable us to use best Ghanaians; full participation of women, youth people living disabilities; above all a leadership that is incorruptible. We will tackle corruption head on, to eliminate waste, make savings double government revenue which we will use to pay our transformational initiatives in education, healthcare job creation. We will also ensure cost-savings through diligence to augment our development budget.

I. Just Disciplined Society:

The PPP will create a just disciplined society a passion excellence within ten years science technology as cornerstone, become a higher level middle income country. This just society will ensure implementation of existing laws intended to make life profitable every Ghanaian including persons living disability. Enforcement of laws, application of sanctions, implementation of technology driven policies accelerated growth, such as full implementation of National Identification Card system, efficiency in public service delivery, use of database to fight crime, facilitate housing planning, effective election management systems, licenses permits etc.

II. Agriculture:

The society we will create will modernize agriculture provide a market to sustain our farmers fishermen. We will use state's purchasing power to provide assurance that labor of our farmers fishermen will not be in vain. We will construct good roads that link farms to market centres to ensure that our farmers are able to transport their produce sale easily, as one way of reducing poverty.

Of equal importance is need to provide ready markets our farmers fishermen to ensure that they are encouraged year on year to produce even more. One way to provide ready market is to ensure that all basic schools on school feeding program as well as Senior High Schools patronize strictly, made in Ghana commodities cooking. In Ghana today, we leave our agricultural products to rot due to our poor infrastructure as happens in Biri-Pro in Ashanti Region many, many other villages in country. We will institute an innovative farm to school table policy that will ensure that freshest, natural produce our farms will be fed to our youth on a daily basis to change face of current school feeding programme which is corruption ridden. Ministries, Departments Agencies will also be instructed to consume strictly 'Made in Ghana' food beverages refreshments at all their programs.

The PPP will use state's purchasing power to create a ready market for our farmers. PPP will empower resource national food buffer company adequate warehousing facilities in every region to carry out this all important mandate. Perishable products such as tomatoes will receive special storage facilities to prevent post-harvest losses. Also, a PPP government will ensure that all tomato factories become viable through expert advice technical assistance to provide ready markets for our tomato farmers.

A PPP administration will ensure existence of low interest loans technical assistance to our farmers to improve their businesses. This will be done through private, public partnership arrangements.

A PPP government will revive almost defunct Kwadaso Agricultural College collaborate more institutions such as University College of Agriculture at BUNSO, University of Ghana, Kwame Nkrumah University of Science Technology, University of Development Studies others to enable Senior High School graduates to pursue courses in Agriculture extension services, soil management, etc. to fill manpower gap in this sector.

III. Reform Strengthen State Institutions:

The PPP will reform state institutions, make government efficient raise revenue to be able to pay public servants well to motivate them to facilitate work of private sector Ghanaian society in general. PPP will work to change portions of Constitution to abolish provision that allows Ministers of State to also serve as Members of Parliament.

We believe that this move will make available governance a large pool of qualified, experienced Ghanaian talent whose expertise is currently unused therefore lost to Ghana. This we will aim to complete in one term of office. Concurrent this objective will be a solid determination to give Parliament facilities resources needed to pass good laws scrutinize proposals submitted by Executive effectively.

We will create a Ministry of Public Service to lead task of continuous reform modernisation of state institutions. A PPP Administration will reduce number of ministers of state to 40 will rely on professional civil local servants to ensure efficient administration.

[graphic:

10 POINT AGENDA

Give Power to People Development

Strengthen Parliament to perform its legislative duties effectively

Provide Better Health Care Cleaner Environment

Attack Crime, Drug Trade Corruption

Create a just disciplined society

Improve Performance of Government

Provide Quality Education Every Ghanaian Child

Provide Energy Industrialisation Rapid Development

Empower Diaspora

Create Jobs

]

Share Power People:

The PPP will work to change portions of Constitution to enable election of all District Assembly Members District/Municipal/Metropolitan Chief Executives to ensure local accountability, elimination of corruption rapid development. This we will do in one term of office. If citizens are capable of electing president members of parliament, they should be credited wisdom to decide who governs them at local government level.

IV. Education:

The PPP will provide Quality Education Every Ghanaian Child. We will standardize school facilities kindergarten to Senior High, libraries, toilets, classrooms, kitchen, housing teachers, playground, etc.: Ensure Free Compulsory education in public schools Kindergarten to Senior (including ICT training). We will deploy an "Education Police" to enforce compulsory aspect of our policy. An integral part of this objective will be an objective to significantly increase vocational training so that all school leavers gain employable skills.

Sports: This education policy vision includes, a comprehensive sports programme to instil discipline promote better health. comprehensive sports programme will ensure that government support, we begin to develop future world Olympic champions. Our performances at successive Olympic Games have not been fitting of a country of our stature. We will upgrade current Accra Sports Stadium to a world class standard.

The PPP policy recognizes need to expand educational facilities to enable every child's demand access to be met. PPP policy will ensure that a "free Senior High School education" is a right to all children does not perpetuate privilege reality of today where only those who

"manage" to pass BECE examination secure a place advance to High School level. Ours is policy that is comprehensive consistent standards set by countries that have overcome underdevelopment poverty in world. When we put back compulsory in education in Ghana, we will set our children on a sure path to success in life.

To ensure success in our overall education policy, we will invest in building of complete school compounds across country including housing teachers upgrading of teacher training institutions. Science, Technology, English, Math Arts will be at heart of our efforts. this, no child living disability, poor or rich, male or female would be left behind.

It is said that "If you think education is expensive, try ignorance". Education is a better driver of a nation's economy than gold, oil, gas such other natural resources. Without it our natural resources become huge burdens on all citizens. PPP is determined to give priority to implementation of our policy in national budgets. We will fund free, compulsory, continuous education vision through government revenue primarily by reducing waste, competent administration checking corruption.

We believe that framers of our 1992 Constitution shared our belief that goal of ensuring an educated knowledgeable people is not negotiable. It is this reason that Chapter Six of Constitution – Directive Principles of State Policy makes clear policy to be implemented by government in area of education.

While our political platform includes practical solutions a broader variety of issues facing Ghana, at core of Ghana's unfulfilled potential is a failure to take decisive policy actions to provide Ghanaians dramatically improved education, healthcare jobs. We need to support Ghanaian entrepreneurial champions who create jobs, make education kindergarten, not just primary school to end of senior high school free COMPULSORY meaning that parents will sleep easy knowing that if their child leaves school to go to beach or play football, they will be found by education police brought back to class.

V. Energy Industrialisation Rapid Development:

The PPP will provide Energy Industrialisation Rapid Development. We will implement solutions a sense of urgency to meet domestic needs industry domestic use make Ghana a net exporter of power again in four years. To enable us achieve this objective, we will provide tax incentives to enable development of alternative sources of fuel power ≠ bio fuels solar. We aim to ensure that contribution renewable sources of energy reaches in a decade, a minimum of 10% of what we need. We will harness our natural resources (particularly oil, gas, bio-gas, wind solar) to ensure maximum benefit prosperity all Ghanaians.

VI. Health Environment:

Prevention is better than cure

The PPP will ensure a cleaner environment free preventable diseases like malaria, cholera guinea worm. We believe that just like countries in Americas, Europe elsewhere became malaria free, so can Ghana right leadership PPP. We will ensure emergency care throughout country to save lives. Our focus will be in area of prevention where education is key. We are close to 60 years of independence, but we still suffer severely grip of preventable diseases. Preventable diseases rob our nation of an energetic workforce. This is not acceptable.

In fighting this menace, there is need to consider some other areas pivotal to success of our agenda; paramount among them is need to solve problem of water supply to ensure clean water every household investment into public houses in order to do away slums. Public Health Nursing Town Council functions will be back on local government development agenda as we go comprehensive decentralization.

We are aware that these will require huge investments that we must make if we want to permanently eradicate preventable diseases. As we have always said, transformation needs great minds insightful leadership PPP insists that new policy initiatives like this one requires dynamic leaders who are capable of managing challenges this transformational policy change will present.

Political leadership have been unable to use aggressive approaches in handling menace ≠ last country wide spraying exercise instance was in 1960s. To reverse this trend, an aggressive uncompromising attitude, a strong will a decisive character is required to eradicate such preventable diseases as malaria cholera our country. Effective leadership; a sense of urgency in addressing issues that directly impact on human survival; adequate education on preventable diseases how they can be prevented are essential ingredients missing so far in Fourth Republic. PPP is here to change that trend, when electorate changes their choices at November 7, polls.

VII. Crime Corruption:

The PPP will attack crime, drug trade corruption aggressively using leadership by example, being modest in government, passing implementing Right to Information Bill ensuring an Independent Prosecutor's Office exists separate Ministry of Justice.

We will strengthen Narcotics Control Board to make it agency responsible fighting drug trade all human, financial other resources needed success. We will strengthen Ghana Police Service by providing resources training to enable them to manage service effectively efficiently, as well as stay ahead in fight against crime.

VIII. Ghanaians in Diaspora:

The PPP will establish a Secretariat to cater needs of Ghanaians abroad African diaspora by June 30th 2017. Provide a support system to encourage re-entry, investment, safe healthy vacations transfer of knowledge technology. We will ensure full citizenship rights to Ghanaians living abroad so that they can vote serve in public sector positions. There is no justification whatsoever to deny our kith kin such rights, when they pour into our economy huge sums of foreign exchange by way of remittances to family friends.

IX. Bringing Economy Back Home:

Our economic policy will revolve around agriculture use of state purchasing power;

The PPP will use government's purchasing power to ensure that we eat what we grow use what we produce in Ghana. We will improve Ghana's business climate to enable investment in job creation so that our people will stay at home to help develop country its economy. Instead of corruption infested political gimmicks like giving out outboard motors premix fuel, we will introduce implement policies that yield to generation of aquatic abundance.

We will be relentless in providing support to Ghanaian industry our farmers fishermen using low interest loans, technical assistance, tax incentives priority access to Ghanaian market. To accelerate job creation nationally, an inter-region highway will be built same high quality throughout country to open up country investment development. In same way, PPP values contribution railways can make to national development. We will implement a sense of urgency plans to extend railways to four corners of country to facilitate movement of goods people.

X. Jobs Millions of Ghanaians:

Jobs millions of Ghanaians are our goal. In PPP administration there will be no Volta Ashanti or Northern region; or PPP jobs. We will provide jobs to go round every Ghanaian in every region simultaneously:

1. Ashanti Region:

Gold abounds in Ashanti region yet it does not serve as a source of mass employment. PPP aims to promote setting up of a gold refinery its related factories manufacturing of jewellery government facilitation, attract international buyers to provide market create jobs.

The PPP takes productivity seriously. Thousands of man hours are

wasted traveling Accra to Kumasi. This journey takes 5 hours on dangerous narrow roads. A new international airport will reduce strain on Accra International Airport air shipping of bulk haulage, to take more dangerous articulated trucks off roads. Ashanti region would be first to manufacture cars bicycles. We will invest in a technical training centre to modernise skills of Suame artisans.

We will seek public private partnerships to establish a factory to produce cocoa sacks footwear in region export these products to other countries in Africa.

2. Brong Ahafo:

The Bui Dam will be used to serve as a point further development of industry in region. Private companies such as Ghana Nuts Company will be supported to expand processing of agricultural raw materials to create jobs. Mining companies in region will be encouraged to become staging points local small business development. Poultry wood processing businesses will be given technical financial support to serve needs of Ghanaian market. regard to poultry farming, state's purchasing power will be used to save industry collapse push it to serve needs of Ghanaians.

3. Central Region:

The Central region is heartbeat of tourism in Ghana people will be made to feel it. Museums Monuments Board Tourism Authority will be empowered resources needed to realise tourism potential of region. world heritage castles forts would be restored to their original grandeur. World class fishing landing ports would be built within first term. First class secondary schools would be expanded to take in more students both local international. Fish processing companies would be established to handle excess fish during bumper periods. An airport, appropriately sized, to harness tourism potential of region will be developed. A PPP administration will aggressively promote through private public partnership fish fruit processing factories in region. example, we will give priority to re-building a fruit processing plant at Asebu make fish processing facility in Elmina work.

4. Eastern Region:

The Eastern region is blessed natural resources such as gold bauxite, fertile farm land is a timber producing area. We will harness abundant water bodies in Afram Plains Kwahu lands to ensure large scale commercial farming to feed our people. We will show proper respect environment even as we seek to ensure that mining in region leads to development of local businesses.

5. Greater Accra:

This region is hub of industry commerce in Ghana but suffers energy deficiency. PPP will work to provide abundant energy to maximise productivity of industry in this region. We have more sunlight than Chinese, more than Europeans, more more than America, yet we do not manufacture solar panels. In four years, technical assistance, we will be able to assemble solar panels in Accra.

Our performance at successive Olympic games, does not befit a country of our stature. We will build a state of art Sports Centre in Accra an Olympic size swimming training school along coast. A unique feature of our plans includes expanding cleaning up water bodies in Accra-Tema area to make them garbage free, mosquito free prepare them to become leisure recreational sites. This will include development of Old Fadama area into a first class park gardens after final resettlement of current residents in a very humane manner. We will ensure protection of region's beaches ocean front to secure homes fishing communities.

We promise to ensure resolution of property rights to free up opportunity to develop large scale salt production in region (Ada its environs) related processing plants. PPP will single-mindedly use powers of state to make pharmaceutical industry become a jewel West Africa beyond.

6. Northern Region:

The Mole Game Park of 25,000 acres would be fenced as has been done Krueggar park in South Africa to prevent animals wandering to neighbouring countries. Fufulso-Sawla road will be maintained as well as upgrading feeder roads leading to park. We will put in an airstrip other infrastructure commensurate its potential to rival game parks on African continent. A six year development plan will be initiated to open up forgotten areas of region especially stretch Nankpanduri, Saboba, Chereponi, Zabzugu, Yendi, Salaga, Bimbilla, Wulensi connecting Nkwanta in Volta region.

The region's potential to become breadbasket of country factories to process meat, maize, groundnuts, soya beans mango will be developed. Due to this increased processing, during a PPP administration, there will be no need to import cooking oil.

7. Upper East:

A first class highway to link Bolga to Wa will be constructed to promote investment in Upper East Upper West regions. trade corridor Bawku, Garu, Tempene Widana to Pusiga will be developed to serve as a hub international commerce Togo Burkina Faso.

We will work towards bringing mechanized farming to facilitate mango

other fruit cultivation in this region. Large scale cattle ranches to enable meat processing will also be delivered.

8. Upper West:

The PPP insists on a high quality highway Brong Ahafo through Upper West to Burkina Faso border to open up region to investment. We will complete modernise University of Development Studies, Wa Campus. In addition, Wa Polytechnic Technical School will be modernised re-equipped to serve purpose.

We will promote development of commerce between region Burkina Faso build an international quality hospital that can attract patronage Cote d'Ivoire Burkina Faso

9. Volta Region:

The Aflao-Lome border post will be further upgraded along other business/industrial parks in area to serve as a regional trade hub, to facilitate job creation. quality of eastern corridor road linking Volta Northern regions will be improved. PPP will fortify beaches to preserve fishing industry, save homes communities sea erosion enhance potential tourism. We will support Ghanaian entrepreneurs to establish rice processing fruit vegetable canning industries in Volta region. We will work our neighbours to plan rail lines to Nigeria to access their market of over 150 million people in that country alone.

Prospects of oil in Keta basin other areas in region will be explored.

10. Western Region:

The PPP will reward people of Western region infrastructure that complements its contribution to nation. In particular, first class highways will connect Shama to Elubo to Enchi, Akontombra, Tarkwa, Bogoso, Prestea, Dadieso, Awaso make travel to Dunkwa Tarkwa much easier. Sekondi-Takoradi will once again become a proud railway hub. A PPP administration will re-develop Western region towns cities beginning oil belt into modern, environmentally sound communities. petrochemicals industry will be critical Western region. We will process gas refine our crude oil to use its by-products produce bitumen, polyester, plastics petroleum jelly. We will encourage oil gas companies led by GNPC to relocate their headquarters offices to Western Region.

The Western region will become a leader in African biofuels industry. We would assist Ghanaian firms in ownership development of palm oil plantations. We will use science technology to plant hybrid plants that mature in 17 months instead of 7 years. Countries like Australia have done it we can do it here in Ghana if we work a sense of urgency. We will stop importation of palm oil to meet our needs domestically.

Virgin Atlantic uses biofuel its planes in four years Ghanaian bio-fuel will fly our export products all over world.

Chapter 5

Working Together

Unlike other Ghanaian political parties, we are not selling an ideological mission to Ghanaian people but rather practical solutions to problems of our dear country. We believe in Progressive way of thinking we are Pragmatists. Ghanaians want food to eat, they want a home to live in, they want good health safe roads, they want best education their children, they want good jobs. We care about governance that works all Ghanaian people we will deliver all this. We care about creating jobs Ghanaian people in Ghana. A new future beckons but it will not come into being unless we make a break old way of doing things ≠ change our choices at November polls.

We are saying that it is time to join hands usher in a new, truly inclusive government led by Progressive People's Party – a government where best people, regardless of political affiliation are appointed to manage affairs of our nation; a government that directly supports Ghanaian businesses to take over local Ghanaian economy.

To make it happen, PPP needs your vote to be able to deliver incorruptible leadership a relentless war on state-sponsored corruption. What our experience in 4th Republic has taught us is that we need a President who is by practical experience best suited job who has demonstrated in his private life in public service ability to deliver positive results a sense of urgency.

Our flag bearer, Dr. Papa Kwesi Nduom, "Edwumawura", we believe is person most suited job of President of Republic of Ghana come January 7th 2017. We recommend him; all PPP parliamentary candidates highly, your votes.

Awake to Competent Leadership

Awake to Incorruptible Leadership

Awake to Education, Health Jobs Every Ghanaian!
